

Java For Each Loop

[< Previous](#)[Next >](#)

For-Each Loop

There is also a "**for-each**" loop, which is used exclusively to loop through elements in an **array**:

Syntax

```
for (type variableName : arrayName) {  
    // code block to be executed  
}
```

The following example outputs all elements in the **cars** array, using a "**for-each**" loop:

Example

```
String[] cars = {"Volvo", "BMW", "Ford", "Mazda"};  
for (String i : cars) {  
    System.out.println(i);  
}
```
